## "Make a Lamp"

### System

#### Lamp Specifications

No. Glass Pieces: 378  
 Glass Needed: 8 sq. ft.  
 Diameter: 18"  
 Height: 10.5"  
 Aperture: 4.5"  
 Design Repeats: 6

#### Needed to make this lamp

Pattern Packet No. CF18-9\*  
 FullForm™ No. CF18\*\*  
 Stained Glass  
 4", 4.5" or 5" Vase Cap\*\*\*  
 Lamp Base or Hanging Hardware  
 to Swag

#### Additional Items Needed

Basic Supplies  
 Basic Tools

#### \*No. CF18-9 Pattern Packet

##### Includes:

1 Paper Pattern Sheet  
 5 MagicStrip™ Sheets  
 1 Instructions  
 1 Color Key w/ Glass Descriptions  
 1 4.5" Glass Band & Crown Jig  
 1 Crown Installation Sheet

#### \*\*No. CF18 FullForm™

360° form embossed and  
 numbered to accept glass

One Reusable FullForm™ is used  
 to make this 6-repeat design

#### \*\* 4", 4.5" or 5" Vase Cap

HC4 VC4 VHC4  
 Need One 4", 4.5" or 5" Vase Cap  
 Sold Separately

# CF18-9 Rose Border 18"

Cartoon Pattern Packet

Rev. 6/13

#### Lamp

## FULL FORM CONSTRUCTION TIPS

Follow the Basic Method detailed in the WordenSystem™ Instruction Manual.

(1) Select, cut, trim, and pin all stained glass pieces over the MagicStrip™ cartoon on the form. COMPLETELY COVER THE FORM. Use glass headed pins or common pins. Be sure to push the pins all the way in to hold each glass piece securely.

(2) To ensure the vase cap will be level: If using a positioner; place vase cap at the top of the form; secure with a lock nut; cut and fit glass to the vase cap; tack solder before removing shade from the form.

If not using positioner: place a 4" threaded rod through the hole in the form; place vase cap at top of the form; put a second vase cap or a check ring or washer inside the form; secure with lock nuts at both ends of the rod; cut and fit glass to the vase cap as above. If necessary, trim the top of the form to fit the vase cap in place.

(3) To foil, pull the pins part way out, just far enough to remove each glass piece one at a time; foil & repin.

(4) Tack solder all glass pieces together. Wipe and burnish with a wet cloth to stop oxidation.

(5) Remove all of the pins. Leave the lamp on the form and make a flat seam by tinning all exposed copper foil. Wipe and burnish with a wet cloth.

Construction tip for 360° Form which curve in at the bottom: When making a lamp on a 360° FullForm™, such as the CF18 which curves in at the bottom, you must remove the shade in two parts either vertical or horizontal. You decide which is most appropriate for your particular lamp shade and skill level. **Please see instructions for details.**

TWO SIDES OF LAMP  
(GLASS PARTS)  
SOLDERED

FORMING  
TWO RIGID  
SECTIONS

DIVIDE LAMP HERE →

(6) DO NOT BUILD ROUNDED SEAMS ON THE FORM. Remove the lamp and fill and then build the inside seams then do the outside.

By filling the inside first, any flow through will be removed when building the outside seams.

Make copies of this picture to try different color combinations for your lamp. Use the paper pattern for glass piece description.

## Strip Grid Cutting

For fast, easy cutting, background may be assembled in strips either horizontally or vertically. Assemble grid vertically so that color flow and grain extends from one part to the next.

Vertical: Arrange the background pieces together similar illustration with no space between. Fasten together with cellophane tape. Notch can be drawn on the glass the center of this line be

Score, break and cl proceeding with the bal how patterns can be gr

Horizontal: First cu the height of each piece row around the lamp wi the rows in a lamp wi t pattern on the glass whi end until you have enough to cover one sectional form or one pattern repeat. Make adjustments if necessary and cut out the number you will need for the entire lamp. Overlap the grid pattern pieces so that adjoining pieces share a score line.

Arrange grid work pattern on strips, mark and score
